Learn from Experience

Follow Instructions

Question: Can we get Machines to learn from ~~Experience~~ too?

**Data**

Response: YES!!

Algorithms teach the computer how to learn from “Previous Experiences” or Data

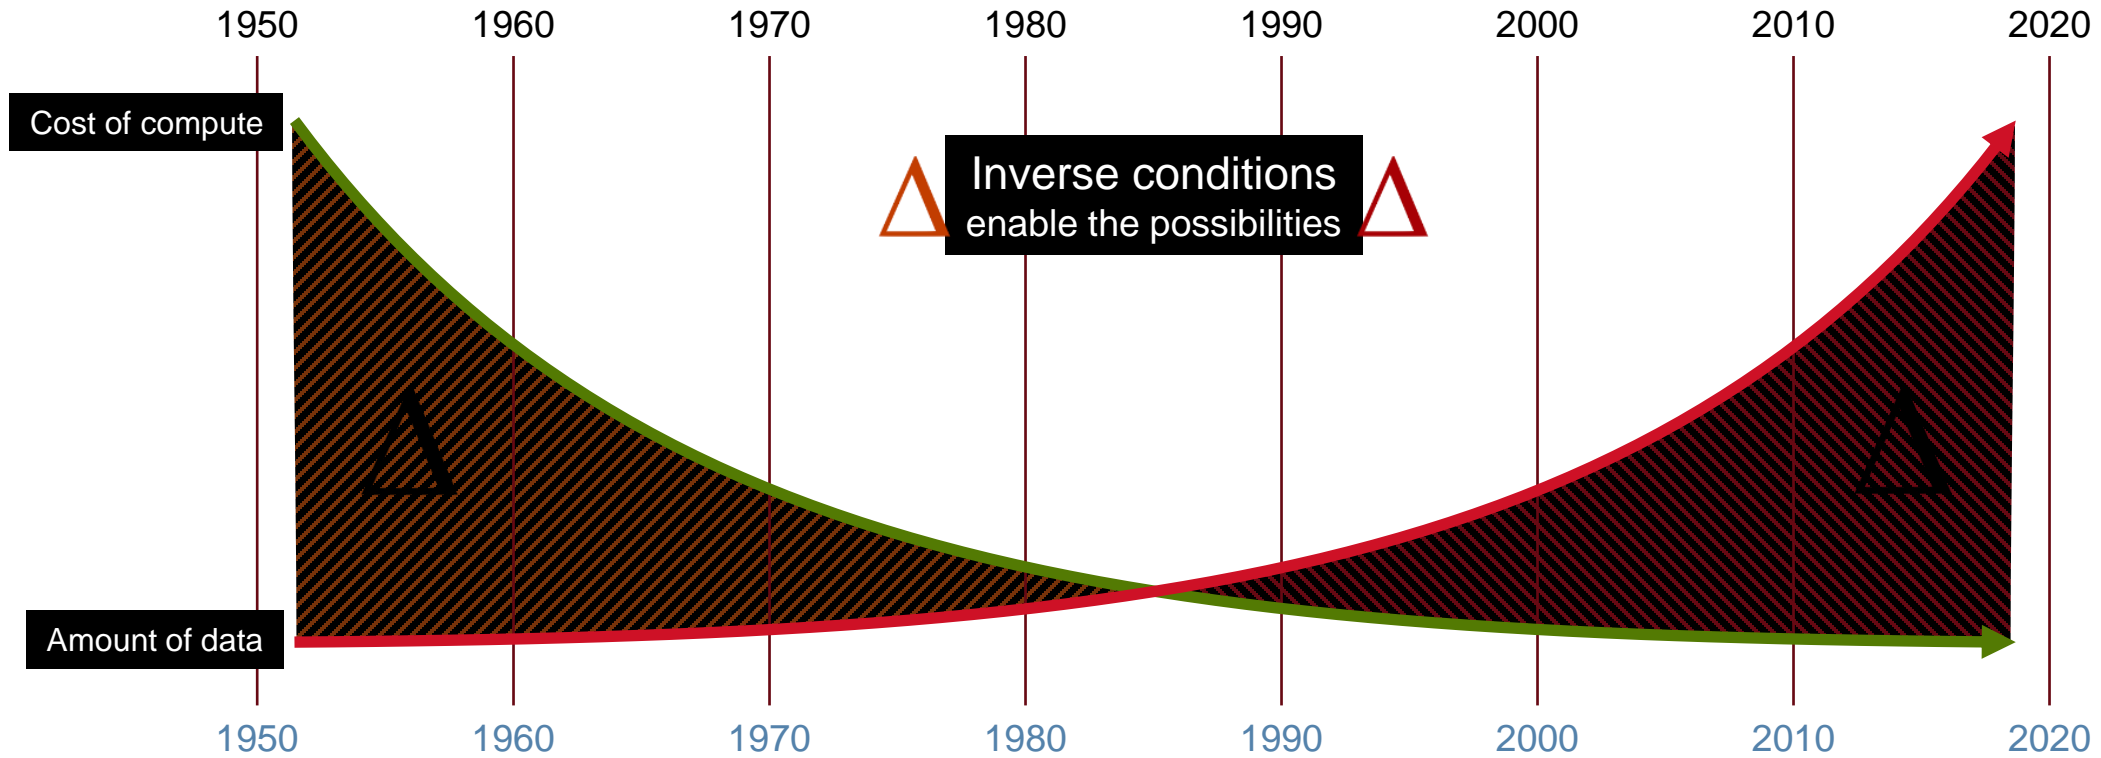

# Brief history of Artificial Intelligence

What makes this time any different?

# Timing is everything ...

Use case

# Hierarchy of needs

## IT environment

Private, public or edge cloud? What are the latency and throughput requirements?

## Software ecosystem

How do I get the trained model into production? What development process—cloud native or monolithic?

## Models

Which model approaches work best? Which tools will the data scientist use to build, train and prove this model?

## Data

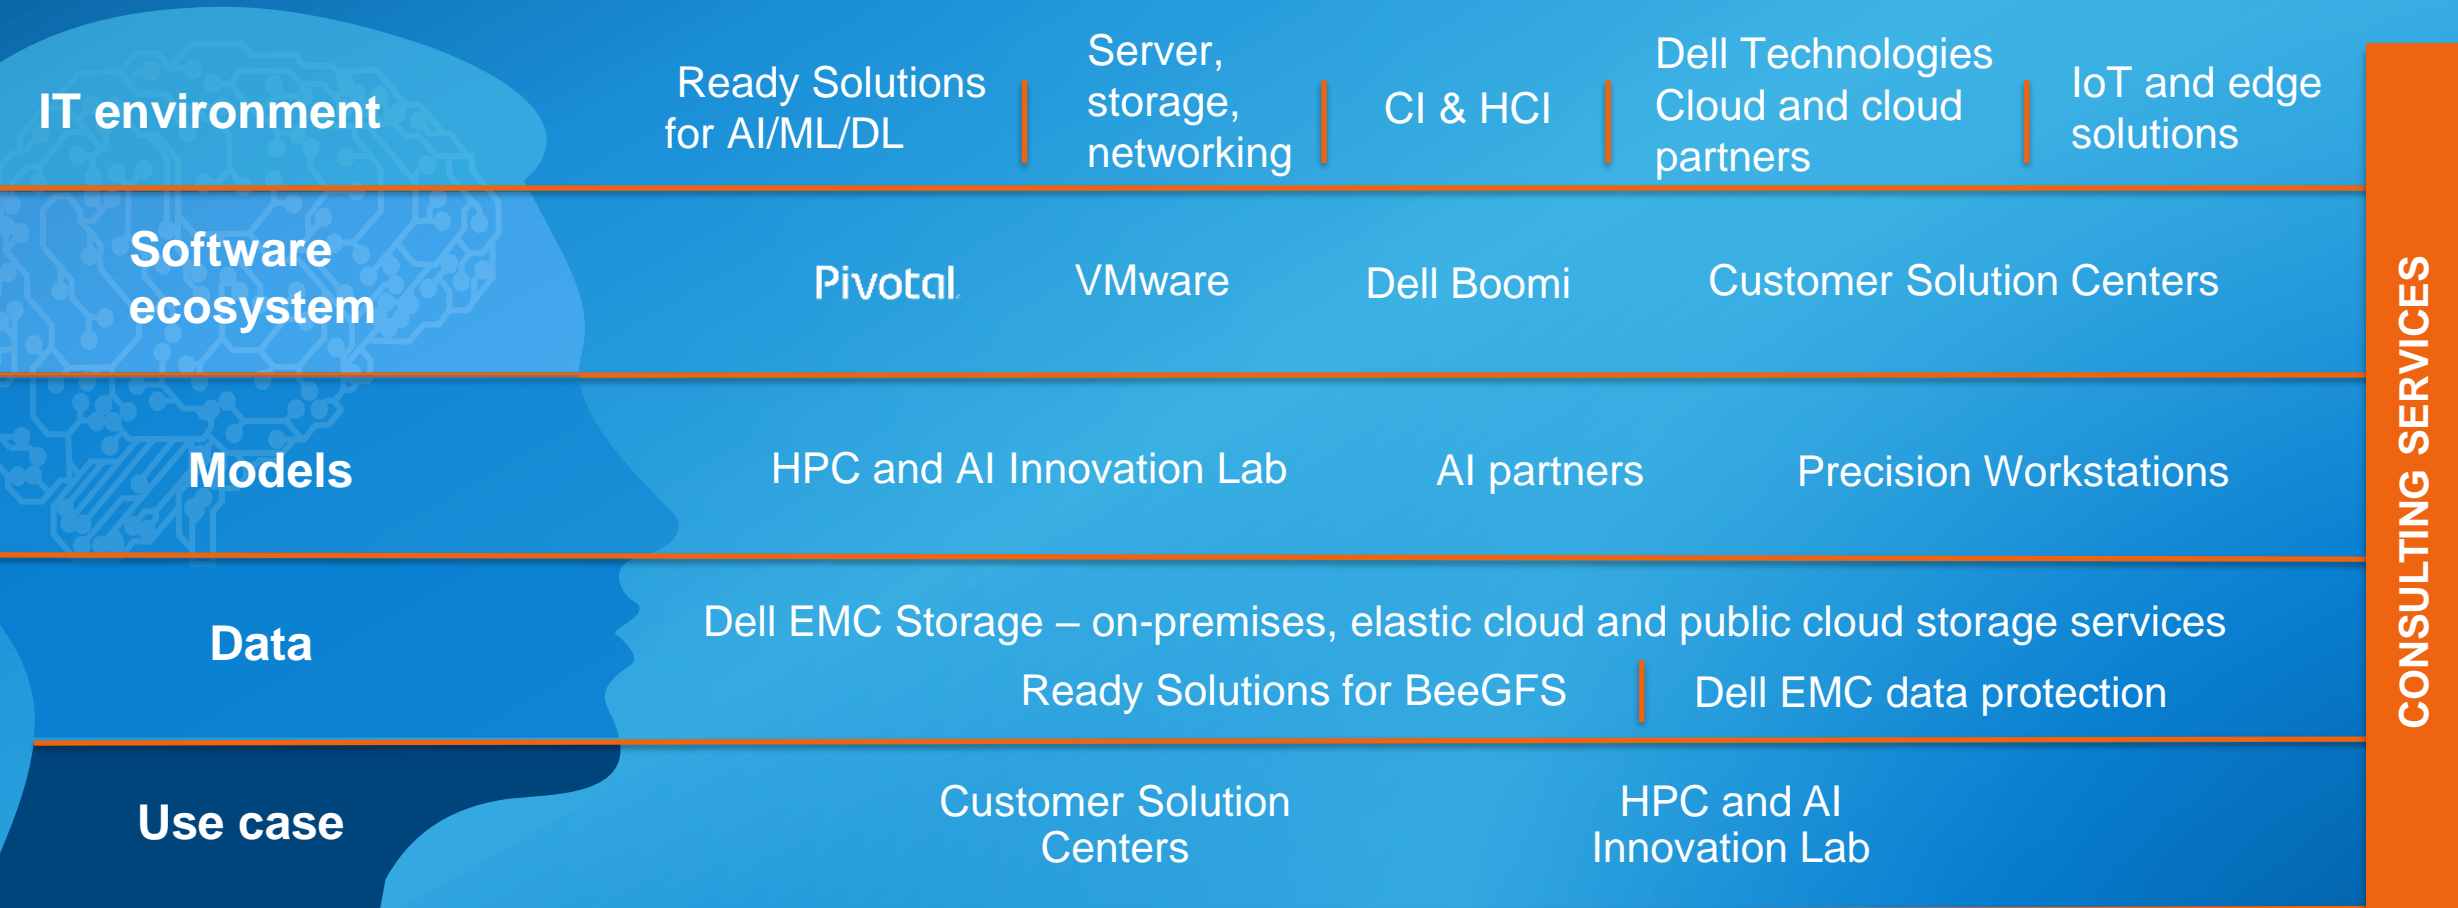

What data is available? Where is the data stored? What needs to be done to prepare it?

## Use case

What's the strategic impact? Is it feasible? How will success be measured?
